

29th April 2022

Dear Parent/Carer,

The Year 11 exam season is almost upon us and in order to support our students to achieve their best we have provided some revision resources on our website. They can be found on www.ssps.org.uk under the Parents tab. If your child needs any hard copies of the revision materials on the website these can be provided. In addition to this we have also provided the following resources:

Impress the Examiner online lessons

All Year 11 students have been signed up for the 'Impress the Examiner' online revision lessons for English, Maths and Science and we would encourage them to take part in these if they can. The timetable for the lessons can be found on the school website.

If your child has forgotten their log in details or password they can speak to their lead teacher who will be able to help them.

Science Open Surgery

Rachel Lloyd will be holding an online Science Open Surgery every Friday afternoon at 3:15pm for any students who want to ask a Science related question or who need any extra clarification on any of the topics. This is open to all so if your child would like to join they can speak to their lead teacher who will give them the Teams meeting log in details.

Online Revision Resources

There are lots links to useful revision websites, video clips etc. on our website for students to use

In addition to the above we will also be providing students with revision packs which they can work through at home.

If you have any questions about your child's revision resources or the exams in general please do not hesitate to contact their lead teacher at school.

Yours sincerely,

C. Martin
